SUMMARY

A recent Computer Science graduate with **hands-on experience** in machine learning, data engineering, and **GPA of 85**.
I strive to work with ambitious companies, fostering their growth while advancing my own skills and career in the process

EXPERIENCE

Machine Learning Engineer

07/2024 - 10/2024 Remote
Freelancer at an Early-Stage Tech Startup

- Built **machine learning pipelines** to train and evaluate models, uncover patterns, visualize data trends, and derive actionable insights
- Conducted data preprocessing and Developed scripts for **web scraping**, **API integration**, and OCR to **automate data collection**, enhancing efficiency and accuracy

Reinforcement lessons instructor

Self
01/2022 - 01/2024
I gave reinforcement lessons in Intro to CS to students, privately and in a group

EDUCATION

B.Sc., Computer Science

Haifa University
10/2020 - 10/2024
GPA:85
Project: Worked on a **Deep learning** oriented **research paper on fine-tuning diffusion models**, leveraging subset selection to improve efficiency while reducing computational resources

PROJECTS

Deep learning - Painter classification

Developing a Deep learning model capable of determining whether two given images belong to the same artist or not.

Software Engineering - High school test system

Using **Java** and **JavaFX**, built a seamless **client-server** architecture leveraging **SQL** database management for critical and real-time data handling

Machine Learning - stock prediction

Actively developing a personal machine learning-driven **value trading** project utilizing **web scraping** and **Python** to identify undervalued stocks and **predict** market trends.
